A man with a dark beard and curly hair, wearing a teal button-down shirt over a white t-shirt, is sitting at a desk and looking at a laptop. The background is a blurred office space with a potted plant and a shelf. The overall lighting is soft and professional.

About the Program

Launch your tech career with our Post Graduate Program (PGP) in Full Stack Development!

PGP in Full Stack Development is a comprehensive 12-month program designed to equip you with the skills needed to build robust web applications and backend systems. Whether you're a beginner or looking to enhance your tech career, this program offers a perfect blend of theory, practical projects, and real-world internship experience.

Duration: 12 Months

6 Months: Training (Modules, Capstone Projects, Assignments)

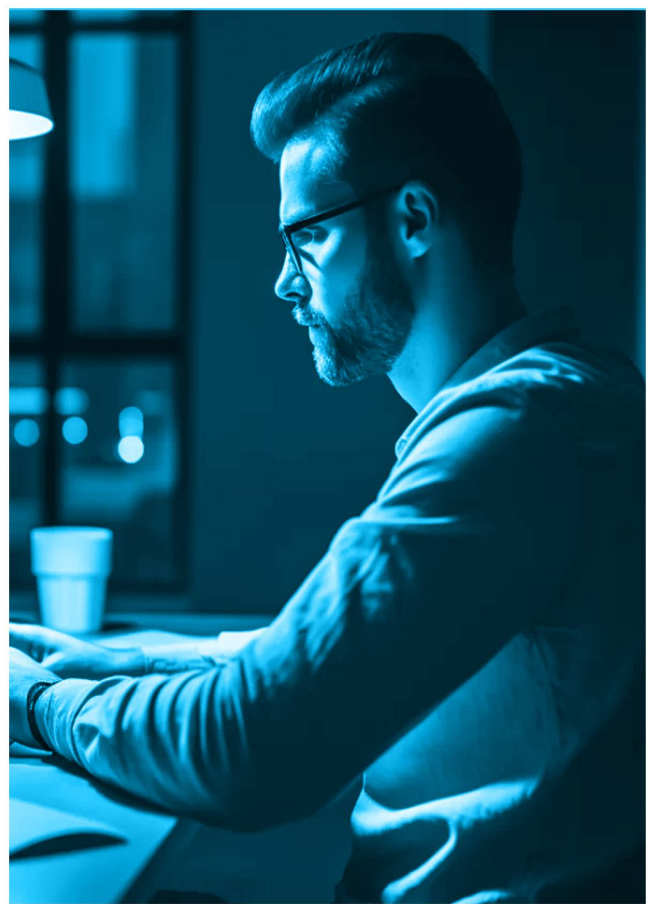

6 Months: Internship + Pre-Placement Activities (Live Internship, Mock Interviews, Placement Support)

Training Phase: Modules and Projects

Over the first 6 months, you'll engage in:

- **Industry-Relevant Modules** covering front-end, back-end, databases, APIs, and DevOps.
- **Capstone Projects** that replicate real-world challenges, helping you build a strong project portfolio.
- **Hands-on Assignments** to solidify your theoretical learning into practical expertise.

Internship and Placement Support

In the second half of the program, experience a 6-month internship where you will:

- **Work on Live Projects** with partner companies.
- **Participate in Mock Interviews** to refine your interview skills.
- **Receive Placement Assistance** through resume-building workshops, interview preparation, and direct connections to hiring companies.

Curriculum
